THE LATEST FROM DR. YOO REGARDING
DERMATOLOGY AND SKIN CARE

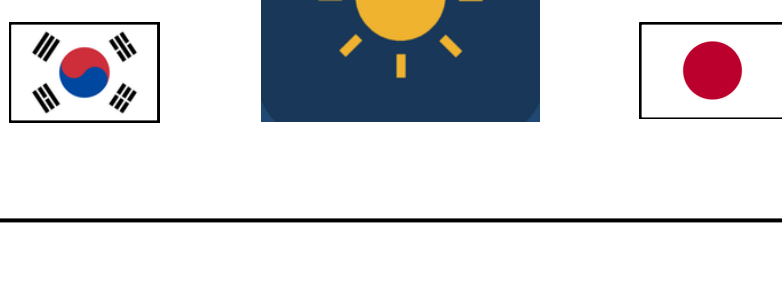

BEMOTRIZINOL IS OFFICIALLY HERE!

As of **August 9, 2026**, the FDA's OTC Final Order on **bemotrizinol (BEMT)** has taken effect – meaning this next-generation broad-spectrum UV filter can now **legally be sold in US sunscreens**. I'm proud to have played a part in getting it across the finish line and was honored to be part of **DSM-Firmenich's** industry-wide celebration and speak about how bemotrizinol offers superior UVA protection compared to many filters currently available in the US, closing a real gap in American sun care.

Curious which sunscreens contain it? Check the Sunscreen Index below to search and compare.

DR. YOO ON THE COVER OF THE DERMATOLOGIST THIS MONTH!

I'm honored to be featured on **the cover of The Dermatologist's August 2026 issue**, spotlighting my use of **handheld ultrasound in daily dermatology practice**.

Ultrasound imaging lets me see beneath the skin's surface in real time, guiding safer, more precise filler placement, helping identify vessels to avoid complications, and even assisting with filler dissolution when correction is needed. It's a tool I've built into a **core part of how I practice**, and I'm excited to share why more dermatologists should be using it too.

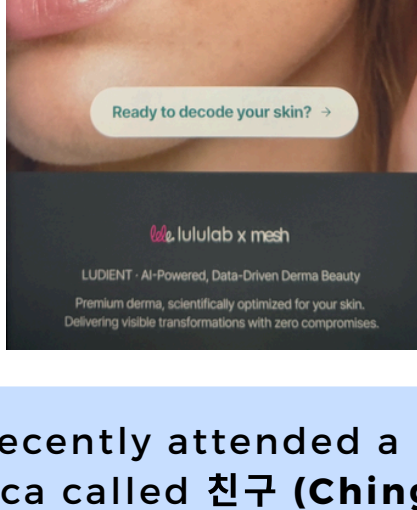

AI INNOVATION: BUILDING A FASTER PATH TO PRIOR AUTHORIZATION

This month, I participated in **Google's "Build with Gemma NYC" hackathon**, a healthcare AI competition focused on building on-device, privacy-first tools. My team built **DermAuth**, an AI agent designed to speed up one of the most frustrating parts of getting biologic treatment for conditions like plaque psoriasis and atopic dermatitis: insurance prior authorization.

K-BEAUTY TECH SPOTTED: LULULAB × LUDIENT

I recently attended a **Private Creator Evening** in Tribeca called **친구 (Chingu)**, hosted by **Mesh**, bringing together **100 of NYC's top creators** with the best of Korean beauty and art innovation. One highlight was seeing **Lululab × Ludient's AI-powered skin analysis** in action firsthand. This was a great example of where personalized skincare is headed!

DR. YOO'S PRESS FEATURES:

Dr. Yoo's expertise continues to be recognized by leading national and industry publications. Recent media features in **The Dermatologist**, **NEWBEAUTY**, **Elle**, and other publications highlight her insights on dermatology, skincare, and emerging trends in aesthetic medicine.

The Latest K-Beauty Trend Feels Like Tiny
Needles on Your Face—but Does It Work?

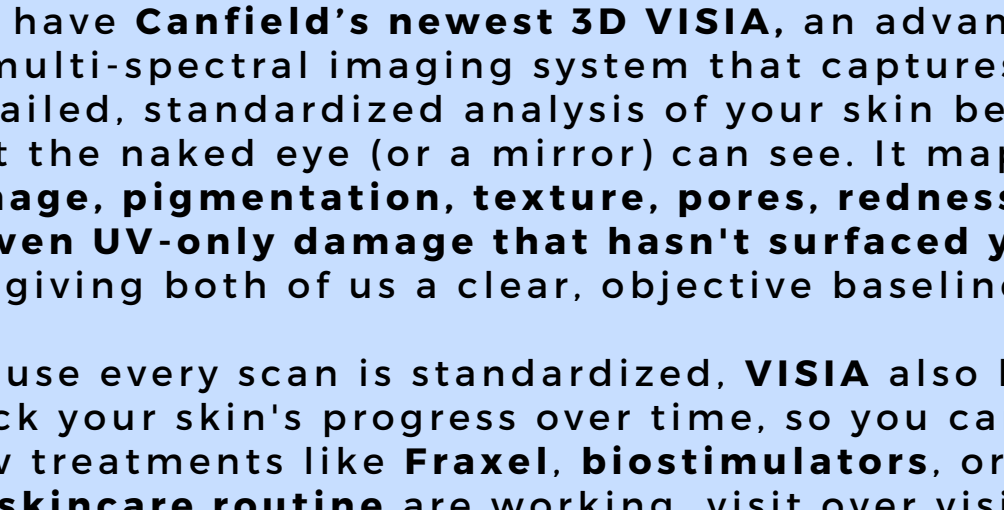

EXCITING OPPORTUNITY! CLINICAL TRIALS

We are currently conducting **two clinical studies** at our office and are looking for eligible participants:

1. For patients currently taking a **GLP-1 medication** who are interested in trying a new topical cosmetic product.
2. For patients interested in injectable filler treatment to improve **mid-cheek facial volume** and contour.

If you are interested in participating or learning more,
please reach out to us at:
clinicaltrials@janeyoomd.com

TECHNOLOGY SPOTLIGHT: 3D VISIA

We are one of the first dermatology offices in the US to have **Canfield's newest 3D VISIA**, an advanced multi-spectral imaging system that captures a detailed, standardized analysis of your skin beyond what the naked eye (or a mirror) can see. It maps **sun damage, pigmentation, texture, pores, redness, and even UV-only damage that hasn't surfaced yet**, giving both of us a clear, objective baseline.

Because every scan is standardized, **VISIA** also lets us track your skin's progress over time, so you can see how treatments like **Fraxel, biostimulators**, or your **skincare routine** are working, visit over visit.

Curious what your skin analysis would show? Reach out to **appts@janeyoomd.com** to schedule a cosmetic consultation.

PRODUCT SPOTLIGHT: JUVELOOK SHINE

Juvelook Shine is the latest addition to the Juvelook line of **PDLLA-based regenerative injectables**, designed to improve overall skin quality and radiance rather than add volume. Like other biostimulators, it works by gently **stimulating your body's own collagen production**, gradually improving skin firmness and glow over the following weeks to months.

Interested in whether Juvelook Shine is right for your skin goals? Contact us at **appts@janeyoomd.com** to schedule a cosmetic consultation.

STAY AHEAD OF THE TREND.
